

Module 1: Governance System and Components:

This module introduces what a governance system is and why it's important in any organisation. You'll see how it helps control and manage IT processes.

- Introduction to the governance system
- Components of the governance system
- Role of governance in organisational structure
- Governance frameworks overview

Module 2: Governance and Management Objectives:

This module explains the goals of governance and management and how both need to work together to support business success.

- Defining governance objectives
- Understanding management objectives
- Alignment between governance and management objectives
- Importance of clear objectives in governance

Module 3: Principles:

In this module, you'll learn the basic principles of COBIT 5. These are the foundations for making good decisions in IT governance.

- COBIT principles overview
- Understanding COBIT principles in governance
- Application of principles in governance processes
- Importance of adhering to principles

Module 4: Framework Introduction:

This part of the course explains the full COBIT 5 framework. You'll see how it has changed over time and what parts are included.

- Overview of the COBIT 5 framework
- Evolution of COBIT frameworks
- Key components of the COBIT 5 framework
- Understanding COBIT 5 domains and processes

Module 5: Implementation:

This module shows how to use COBIT 5 in your job or project. It gives you steps and best practices for success.

- Steps for implementing COBIT 5
- Integrating COBIT 5 with existing processes
- Addressing implementation challenges
- Best practices for COBIT 5 implementation

Module 6: Designing a Tailored Governance System:

Here, you'll learn how to make governance systems that fit your specific company or project. This is important because not every organisation is the same.

- Customising governance systems
- Assessing organisational needs
- Mapping COBIT 5 to organisational requirements
- Tailoring governance processes

Module 7: Performance Management:

In this module, you'll learn how to check if your governance system is working. This module covers how to use measurements and performance indicators.

- Importance of performance management in governance
- Key Performance Indicators (KPIs) in governance
- Monitoring and evaluating governance performance

- Continuous improvement in governance processes

Module 8: Business Case:

This final module teaches you how to show others the value of using COBIT 5. You'll learn how to explain the benefits in terms of money and performance.

- Developing a business case for governance
- Justification for investing in governance
- Cost-benefit analysis of governance implementation
- Communicating the business case to stakeholders
