

ITIL® 4 Specialist: High Velocity IT (HVIT) Certification Training

LESSON 01 - COURSE INTRODUCTION

- Brief Introduction of ITIL HVIT Course

LESSON 02 - HIGH VELOCITY NATURE OF DIGITAL ENTERPRISE

- High Velocity Nature of Digital Enterprise
- Key Concepts of High Velocity IT
- Digital Technology
- Digital Organization
- Digital Transformation
- IT Transformation
- Digital Products
- Service Interactions
- High Velocity IT Objectives
- Techniques for Valuable Investments
- Techniques for Fast Development
- Techniques for Resilient Operations
- Techniques for Co-Created Value
- Techniques for Assured Conformance

LESSON 03 - DIGITAL PRODUCT LIFE CYCLE

- Digital Product Life Cycle
- ITIL Operating Model
- Digital Product Life Cycle
- Digital Product Life Cycle: Customer's Perspective
- The ITIL Service Value Chain
- Value Chain Activities Combined with DevOps
- Service Consumer and Service Provider Interactions
- Value Streams
- Making Value Streams Effective

- The Four Dimensions of Service Management
- Information and Technology
- Partners and Suppliers
- Value Streams and Processes
- Four Dimensions: External Factors

LESSON 04 - HVIT APPROACHES

- High Velocity IT Approaches
- Key Characteristics of High Velocity IT
- Lean
- Agile
- Resilient
- Continuous
- HVIT Characteristics to Co-create Value
- Key Behavior Pattern
- Models and Concepts of HVIT Culture
- Ethics
- Ethical Behavior
- Ethical Behavior - Artificial Intelligence
- Ethics - Typical Behavior Patterns
- Design Thinking
- Design Thinking: Behavior Patterns
- Safety Culture
- Working in Complex Environments
- Complexity Thinking: Cynefin Model
- Working in Complex Environments Behavior: Patterns
- Lean Culture
- Elements of Lean Culture
- Lean Culture Behavior: Patterns

- ITIL Continual Improvement Model
- Toyota Kata
- The OODA Loop
- Continual Improvement Behavior: Patterns

LESSON 05 - HIGH VELOCITY IT TECHNIQUES

- High Velocity IT Techniques
- Valuable investments
- Prioritization Techniques
- Other Prioritization Techniques
- Minimum Viable Products and Services
- Practices for Minimum Viable Products and Services
- Product or Service Ownership
- AB Testing
- Portfolio Management
- Portfolio Management Practice - Success Factors
- Ensuring Sound Investment Decisions
- Ensuring Continual Improvement of Portfolios
- Fast Development
- Infrastructure as Code
- Practices for Infrastructure as Code
- Loosely Coupled Information System Architecture
- Practices for Loosely Coupled Information System Architecture
- Reviews and Retrospectives
- Blameless Postmortems
- Continual Business Analysis
- Practices for Continual Business Analysis
- Continuous Integration, Delivery, and Deployment
- Practices for CI-CD

- Continuous Testing
- Types of Software Testing
- Kanban
- Architecture Management
- Architecture Management Success Factors
- Business Analysis
- Business Analysis: Success Factors
- Deployment Management
- Service Validation and Testing
- Service Validation and Testing: Success Factors
- Factors for Test strategy
- Software Development and Management
- Software Development and Management: Success Factors
- Resilient Operations
- Technical Debt
- Chaos engineering
- Chaos Monkey
- Definition of Done
- Definition of Done: Considerations
- Definition of Done: High Impact Practices
- Version Control
- Version Control: High Impact Practices
- AIOps
- AIOps: High Impact Practices
- ChatOps
- Site Reliability
- Site Reliability Engineering - High Impact Practices
- Availability Management

- Availability Management: Success Factors
- Capacity and Performance Management
- Capacity and Performance Management: Success Factors
- Measure, Assess, and Report Performance and Capacity
- Monitoring and Event Management
- Monitoring and Event Management - Success Factors
- Ensuring Availability of Data
- Problem Management
- Service Continuity Management
- Service Continuity Management - Success Factors
- Infrastructure and Platform Management
- Infrastructure and platform management: Success factors
- Meeting the Organization's Needs
- Co-Created Value
- Co-Created Value in HVIT Environments
- Service Experience
- Assured Conformance
- DevOps Audit Defense Toolkit
- DevSecOps
- Peer Review
- Information Security Management
- Information Security Management: Success Factors
- Risk Management
- Establish Governance and Nurture Culture
- Risk Analysis
